Cybersource Corporation (Cybersource) furnishes this document and the software described in this document under the applicable agreement between the reader of this document (You) and Cybersource (Agreement). You may use this document and/or software only in accordance with the terms of the Agreement. Except as expressly set forth in the Agreement, the information contained in this document is subject to change without notice and therefore should not be interpreted in any way as a guarantee or warranty by Cybersource. Cybersource assumes no responsibility or liability for any errors that may appear in this document. The copyrighted software that accompanies this document is licensed to You for use only in strict accordance with the Agreement. You should read the Agreement carefully before using the software. Except as permitted by the Agreement, You may not reproduce any part of this document, store this document in a retrieval system, or transmit this document, in any form or by any means, electronic, mechanical, recording, or otherwise, without the prior written consent of Cybersource.

Restricted Rights Legends

For Government or defense agencies: Use, duplication, or disclosure by the Government or defense agencies is subject to restrictions as set forth the Rights in Technical Data and Computer Software clause at DFARS 252.227-7013 and in similar clauses in the FAR and NASA FAR Supplement.

For civilian agencies: Use, reproduction, or disclosure is subject to restrictions set forth in subparagraphs (a) through (d) of the Commercial Computer Software Restricted Rights clause at 52.227-19 and the limitations set forth in Cybersource Corporation's standard commercial agreement for this software. Unpublished rights reserved under the copyright laws of the United States.

Trademarks

Authorize.Net, eCheck.Net, and The Power of Payment are registered trademarks of Cybersource Corporation. Cybersource, Cybersource Payment Manager, Cybersource Risk Manager, Cybersource Decision Manager, and Cybersource Connect are trademarks and/or service marks of Cybersource Corporation. Visa, Visa International, Cybersource, the Visa logo, the Cybersource logo, and 3-D Secure are the registered trademarks of Visa International in the United States and other countries. All other trademarks, service marks, registered marks, or registered service marks are the property of their respective owners.

Confidentiality Notice

This document is furnished to you solely in your capacity as a client of Cybersource and as a participant in the Visa payments system.

By accepting this document, you acknowledge that the information contained herein (the Information) is confidential and subject to the confidentiality restrictions contained in Visa's operating regulations and/or other confidentiality agreements, which limit your use of the Information. You agree to keep the Information confidential and not to use the Information for any purpose other than its intended purpose and in your capacity as a customer of Cybersource or as a participant in the Visa payments system. The Information may only be disseminated within your organization on a need-to-know basis to enable your participation in the Visa payments system. Please be advised that the Information may constitute material non-public information under U.S. federal securities laws and that purchasing or selling securities of Visa Inc. while being aware of material non-public information would constitute a violation of applicable U.S. federal securities laws.

General Information

These release notes cover all releases to the production server for the week ending April 15, 2022.

Announcements

Warning: Passing six-digit BINs can result in no match being generated when there are multiple possible matches. We recommend that you update your systems to pass eight-digit BINs as soon as possible.

Bug Identified in REST Response Field

When submitting the `processinformation.authorizationOptions.initiator.credentialStoredOnFile` REST field to the `/tss/v3/transactions/{id}` endpoint, the possible values are `Y` or `N`, not the expected `True` or `False`. The issue is under investigation and a fix will be provided soon.

Internet Explorer 11 No Longer Supported

The Business Center no longer supports Internet Explorer 11. Business Center users should update their browsers. See the [Support Center article on supported web browsers](#) for more details.

Bank Identification Number (BIN) Checking Not Supported for Network Tokens

At this time, PaRC does not support BIN classification on network tokens. Because BIN classification and BIN check are unavailable, network token transactions follow these rules:

- All network token transactions are treated as domestic transactions.
- All network tokens default to the domestic credit card type.
- No validation occurs on wallet load funding if an international network token is processed.
- No blocking is possible for debit or prepaid transactions because all network tokens are treated as the credit card type.
- Network tokens without BIN classification have no effect on the E-Commerce Indicator (ECI) classification function.

Customers will be notified when the Cybersource BIN Lookup Service becomes available for network tokens.

Features Introduced This Week

- [RM-14750] The GPX Retrieval Reference Number is now returned in API calls and is populated in the Business Center.
- [RM-14682] In the Business Center, the IP Management, Merchant Contact, Role Management, and User Management modules now support elastic merchant search capabilities.
- [RM-14578] The messages when a transaction is held for review or rejected by Decision Manager or Fraud Management Essentials are improved.
- [RM-14655] Two new Visa Platform Connect gateways, Ishtar Gate for E-Payment and First Citizens Bank, are added. VisaNet Peru has removed card types. Card-present Visa Platform Connect acquirers now have a parameter for enabling PIN translation.
- [RM-14684] Apple Pay support is now enabled for MADA transactions.
- [RM-13527] Decision Manager time zones and date/time formats now reflect the user's preferences first, then the merchant preferences, then default settings. These preferences apply to dates and times displayed within the Business Center, and not files exported from Decision Manager.
- [RM-14377] Level 2 and Level 3 transactions are rejected if submitted with a card type other than Visa or Mastercard.
- [RM-14377] Hard declines now include the MID and TID in the response, to support reporting.
- [RM-14377] The subscription service now supports 19-digit card numbers for the HISO Gateway.
- [RM-14377] The HISO gateway now supports cobranded China UnionPay cards.
- [RM-14825] Pay By Link is now protected from bot attacks by Visa Behavioral Analytics.

Fixed Issues

- [RM-14377] In-App transactions now receive the correct EMV value of 32 when 3-D Secure is not present.
