General Information

These release notes cover all releases to the production server from March 14, 2021, to March 19, 2021.

Announcements

New Reply Field for Secure Acceptance

Cybersource added a new reply field, **payment_account_reference**, to Secure Acceptance in both the Hosted Checkout and Checkout API integrations.

To avoid impact:

- Parse the reply data according to the names of the fields instead of their order in the reply. For more information on parsing reply fields, see the *Secure Acceptance Checkout API Integration Guide* or *Secure Acceptance Hosted Checkout Integration Guide* for your scripting language.

- The signature that you generate must be the same value that is included in the signature response field.

- Your error handler should use the decision field to determine the transaction result if it receives a reason code that it does not recognize.

- If your implementation expects static response fields, build the signature string dynamically instead, as specified in the *Secure Acceptance Checkout API Integration Guide* or *Secure Acceptance Hosted Checkout Integration Guide* and the sample code.

The Secure Acceptance integration guides and the sample code documentation are at this location:

https://www.cybersource.com/en-us/support/technical-documentation/apis-and-integration.html#SecureAcceptance

Contact your customer support, technical account manager, or account manager for more details.

Cybersource through VisaNet Rebranding

The Cybersource through VisaNet product is now called *Visa Platform Connect*.

Features Introduced This Week

Quod Credit Bureau Support in Decision Manger
[RM-8540] Credit scores and credit reports from Quod Credit Bureau in Brazil are now available in Decision Manager.

Decision Manager can now identify 29 new free email domains
[RM-8891]

New ECI values for 3D Secure
[RM-8633] To support 3D Secure for China Union Pay, three new ECI values and SCA exemption indicators have been added.
